**ENEIDA
TEIXEIRA**

Risk Factors for Maternal Mortality: A Systematic Review and Meta-Analysis

Eneida is a PhD student in Nursing at the Federal University of Santa Catarina (UFSC) in Florianopolis, Brazil. Her PhD study is titled 'Care for Women during Labour and Birth'. She will be presenting preliminary findings from her systematic review of observational studies on risk factors for maternal mortality.

Eneida has a graduate degree in Nursing from UNIVALI; and a postgraduate degree in Gynaecologic and Obstetric Nursing. She has a Master degree in Health and Work Management.

She is currently working in an emergency public health service, and teaching on the Undergraduate Nursing Course at UNIVALI.

Her research interests include: women's health; maternal and child health; abortion, spatial analysis, epidemiology, quantitative research; and, systematic reviews.
